FINANCIAL CRIME & AML ANALYST

SUMMARY

AML analyst at Protiviti with hands-on experience in transaction monitoring, money laundering and fraud investigations, and suspicious transaction reporting in a high-volume, audit-driven environment. Identifies red flags and typologies (structuring, mule networks, social engineering, rapid movement of funds) and builds evidence-backed case files and written findings that hold up to QA and regulatory review. As Pod Deputy, turns QA findings into coaching, rule-tuning recommendations, and training materials. Independently designed and built SENTINEL, a browser-based AML training simulation.

EXPERIENCE

Financial Crimes Compliance Analyst — Protiviti, Boston, MA

June 2025 – Present

Pod Deputy (appointed July 2025)

- Developed and maintained job aids and training materials codifying typology and disposition standards, used to onboard and support analysts across the pod.
- Serve as liaison between first-line investigators and second-line QA, turning recurring findings into coaching and rule-tuning recommendations that improve detection and documentation quality.

Investigations

- Conduct 10–15 financial crime investigations per week, triaging transaction-monitoring alerts and completing case dispositions within SLA using a structured, risk-based framework.
- Identify and document fraud and money-laundering typologies — structuring/smurfing, mule account activity, e-Transfer abuse, rapid movement of funds, cash-intensive risk — with clear linkage between behavioral indicators and disposition rationale.
- Draft Suspicious Transaction Reports (STRs) to FINTRAC: policy-grade narratives connecting indicators → evidence → conclusion with the precision required for regulatory and legal review.
- Build audit-ready case files (chronologies, workpapers, supporting documentation) and written summaries of findings, keeping every decision consistent, complete, and defensible.

Host / Takeout / Prep Cook — Stoked Pizza Co., Cohasset, MA

Jan 2025 – May 2025

- Served 200+ guests/day in high-volume front-of-house operations; maintained 95%+ satisfaction and full inspection compliance during peak periods.

FOH Specialist — Not Your Average Joe's, Norwell, MA

Jan 2020 – May 2024

- Handled \$3,000+/day in takeout and payments; trained 5+ new hires with emphasis on accuracy and throughput under pressure.

PROJECTS

SENTINEL — AML Training Simulation — Independent Project

2025 – Present

- Designed and built a free, browser-based AML investigation simulator in React. Users work transaction-monitoring alerts at an analyst desk, disposition each case No Further Action or File SAR, and get graded accuracy and efficiency feedback. Analyst Mode scores SAR narratives on who, what, when, how, and why.
- Wrote 45 cases across three in-game weeks covering 17 typologies, from structuring and mule activity to TBML, the OFAC 50% Rule, and pig-butcherer.
- Built with AI-assisted development using Claude; live at amlg.netlify.app, with no login and progress saved in the browser.

EDUCATION

B.S. Accounting and Finance

2024

Southern New Hampshire University, Manchester, NH

CERTIFICATIONS

Google Data Analytics Professional Certificate

2024

Coursera

SKILLS

Financial Crime Compliance: AML and fraud investigations, transaction monitoring, red-flag identification and escalation, money laundering and fraud typologies (structuring, mule activity, social engineering, e-Transfer abuse, rapid movement), STR drafting (FINTRAC), audit-ready documentation

Data Tools: SQL, Tableau, Microsoft Excel (advanced)

Policy & Operations: Case workflow design, policy documentation, analyst training, QA liaison, process improvement

Outside Work: Electronic music production in Ableton (House, Tech House, Garage, Trance, Techno, Drum & Bass) and DJing
